

Our opinion about KB Systems

February 22th, 2016

We are now working for almost two years with KB Systems for different web projects. We really appreciate the corporation with the company and teh individuel programmers. Important for oour company is that they repons quick to questions, they can estimate projects very well in time and costs. I really like the way they work with the ticketting system to communicate about issues and the project management is done very professional. They can built different kind of open source content management systems, so this makes them a flexible partner.

With kind regards,
Two Visions
